

XVS-9M

Metal Detection System

**SECURITY
DETECTION**
METAL DETECTORS X-ray MACHINES

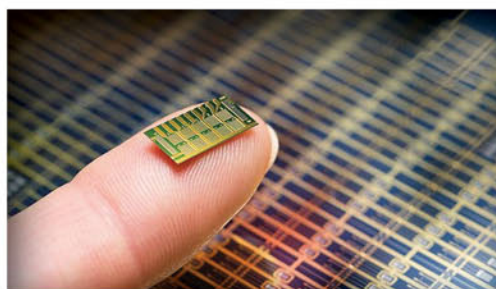

The **XVS-9M** is designed specifically for companies with a small work force or a small budget. You no longer need to be without quality protection. The XVS-9M delivers incredible sensitivity at a more affordable price.

Features:

- Ultra high sensitivity with digital control
- Detection of metal concealed on or in the body
- Improved calibration options
- 3 frequency options
- Improved system stability
- Computer enhanced detection
- Simplified setup and operation
- Pinpoint accuracy with the included hand scanner.

Applications:

- Jewelry Manufacturing
- Mining and Refining
- Precious Metal Foundries
- Computer and Microchip Manufacturing

XVS-9M

Metal Detection System

SIMPLE OPERATION

- Simply select the desired sensitivity level, and "fail threshold", begin sending employees through the system.
- All failures activate an audible alarm
- Pinpoint the cause of the failure with the included "high sensitivity" hand held detector.
- Simple operation improves entry/exit proficiency dramatically.

System Specifications:

- XVS walk-through arch
- IBM compatible computer with 17" flat panel color monitor and Windows XP Professional
- Basic Metal Detection Hardware
- Basic Metal Detection Software
- Un-interruptible Power Supply (UPS)
- Associated interface cables and circuit boards
